

CASE STUDY

RJ Griffin Case ...“There were a lot of unknowns with that job, the building was 20 to 30 years old. When we took the stucco off, we found it was a concrete block building. The substrates were all over the place as far as dimensions were concerned, and they were out of square.”

“There were a lot of preparatory corrections that had to be done to the building before the EIFS could be applied. So it took a lot of coordination with Sto to get the substrates to a point where EIFS would be able to meet the Assured Performance Warranty. It was a difficult project, but it turned out great, thanks in large measure to Sto’s people and products.”...

ATTENTION

Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto’s instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, or for other construction activities beyond Sto’s control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to this product, and to the structure of the building or its components. **STO CORP. DISCLAIMS ALL WARRANTIES EXPRESS OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO’S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME.** For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.

EIFS / Stucco Maintenance and Restoration

Quality does not always have to be sacrificed for low price

Using quality repair and coatings products can help reduce long term wall maintenance costs.

Coating your investment with lower-quality materials increases the risk of increased maintenance issues as the structure ages.

Sto EIFS and Stucco repair and recoat products give you the combination of quality materials that will protect the structure far longer than off-the-shelf coatings that promise your everything yet fail when you need the protection the most.

Sto's expertise as a claddings manufacturer gives you the advantage of having a resource with real experience in recoating and recladding

Less problems translate into fewer callbacks for recoating failures on the wall. Fewer callbacks affect your bottom line whether you own the building or are installing the new materials.

Let the Sto Corp. team work with you by providing the experience and the quality materials you want and your project deserves.

Warranty extensions are available on projects where Sto repairs are done to an existing Sto clad project

Because Sto claddings allow for better overall performance, extending existing warranties will bring you piece of mind as well as the security of additional Sto protection. Extensive warranties are available depending upon the solution, with premium extended full system warranties (including current cladding) if the existing cladding is a Sto system and the project meets other criteria. See your Sto representative for more details.

How can you utilize the Sto Repair and Recoat Advantage?

Specify Sto high-quality coatings and claddings for your next project and see how decades of experience and innovation can make your buildings' exterior perform like new.

Take advantage of Sto's superior service and support network that gives you an advantage over cheap and under-performing products on the market.

Additional repair, recoat, and renovation resources from Sto Corp.

Sto has a variety of information available on repair and recoating materials for all types of exterior wall claddings. Visit Sto Corp. on the web at www.stocorp.com to download detailed literature or call us toll-free at 888-552-4111.
